Experience

Software Developer (Contract)
Deep Space Robots • Mar 2021 – June 2021
- Hired for a 3-month contract to deliver 2 client MVP platforms using the MERN stack, and ship minor features for existing Rails apps
- Collaborated with a small design team to turn Figma wireframes into production-ready code

Software Engineer
IBM • Jan 2020 – Sep 2020
- Lead developer for an internal sales fulfillment platform. Coordinated sprint meetings and prioritized feature requests by writing out user stories provided by user feedback (Jira, Trello)
- Styled user interface (UI components) with IBM's Carbon Design System using React hooks, GraphQL, Elixir/Phoenix
- Optimized and modified existing internal RESTful API's to disconnect data flow from SalesForce (Ruby on Rails)
- Wrote and modified unit tests, as well as diagnosed and fixed server errors for internal sales fulfillment platform (RSpec, Minitest, Sentry)

Software Engineer Apprentice
IBM • Feb 2019 – Jan 2020
- Selected as 1 of 5 participants for an 11-month software engineering apprenticeship program, where I followed agile practices to refine and ship features for the IBM Aspera On Cloud SaaS offering
- Wrote Ruby scripts to persist new data to database, updated existing CLI tools for internal customer usage metrics, and generated CSV reports

Education

Bethel School of Technology
Software Developer Certificate • Apr 2018 – Nov 2018

University of Louisville
B.S. Business Administration, Finance • Aug 2008 – May 2012
